INNDIH presentation

Valencia Region Digital Innovation Hub

Brief presentation

Objectives, mission, partners, clients, sector, technical focus, ...

Mission

InnDIH is the Digital Innovation Hub of the Valencian Region that was created with the aim of contributing to the digitalization of SMEs and promoting the economic development of the region.

Companies can access services provided by InnDIH`s partners in the field of digital technologies. Mostly:

Artificial intelligence
Manufacturing technologies and industry 4.0
Health and society

OBJECTIVES

Establishment of agreements/corridors with other DIHs and eDIHS

Support to facilitate access to public and private financing for the development of digital technologies

Access to experimentation infrastructures to validate business ideas supported by technology

Access to digitalization knowledge that improves worker training

Access to demonstrators to visualize the impact of digital technologies

INNDIH PROJECT

- InnDIH recognized as eDIH by the European Commission
- 3 years (January 2023- Dec 2025)
- 100% subsidized services
- Cofinanced by regional and national government
- Objective: 889 services (SMEs + Public Administrations)
 - Test before invest: 329 + 32
 - Support to investments: 139 + 0
 - Ecosystem + networking: 156 + 5
 - Skills + training: 216 + 12
- Arrival at 2,950 SMEs/Public Administrations
- 15 agreements with other eDIHs
- InnDIH provides services to companies from other eDIHs
- Valencian Region companies access services from other eDIHs

We export:

Demos in a realistic environment, capabilities in Health, Big Data Space, AI Tools

We import:

HPC, Cybersecurity, Training, Primary sector

Proposed activities and services

- Foster collaboration in already running and new inter-regional projects
- Exchange of use cases
- Joint webinars and/or digital roundtables to exchange experiences
- Matchmaking events and activities to foster the adoption of digitalisation,
- Conferences or workshops and specific working groups.
- Commonly developed, next-to-come shared services
- Signposting of companies

Practical advice

Practical advice

- Define the value proposition and specialization of the EDIH
- Focus and effort on identifying the needs of SMEs
- Usually, SMEs need a maturity diagnosis and situation analysis as the first step.

About InnDIH

InnDIH is the **Valencian Region European Digital Innovation Hub (EDIH)** led by **ITI**, which represents the great centralized commitment of public-private collaboration where the business ecosystem, universities, technology and research centres, biotechnology-health research institutes and public administrations join efforts to **contribute to the digitization of SMEs and public administration and boost the economic development of the Valencian Region**.

InnDIH **promotes digital technologies** and ensures that any company and public administration in the region has access to know-how, training, technologies, infrastructures and laboratories to improve and accelerate its digital transformation.

InnDIH has been established as a **non-profit consortium** with a solid experience and connections at the European level which promotes the development and implementation of digital technologies in the priority domains of **Health and Quality of Life and Advanced Manufacturing**, as well as in any other domains where digital technologies are required.

The partners have an **extensive background and experience** in providing a wide range of digital solutions and services that are mainly based on **Artificial Intelligence (AI)**, as well as other technologies such as **HPC, Cybersecurity, Big Data** and **Robotics**, with high cross-sectorial transversality.

Additionally, **agreements have been established with other EDIH candidates** to cover additional areas. This set of services is based on demonstration, enabling, and experimentation infrastructures and is adapted to the needs of the territory, covering the different sectors of the Valencian Smart Specialization Strategy (RIS3CV).
