

Working Group Health

Prof. Sebastiaan Meijer

KTH Royal Institute of Technology,
Stockholm

EDIH Network

Health: a little different.....

- A highly decentralised decision-making system
- With strong professional evidence requirements
- And a weak capability to exchange data
- Governed by many regulations

- How do we move forward?

Different dimensions covered in our EDIHs

- Hospital Care <-> Everyday Health
- Small-scale data <-> Large-scale biobanks
- Young age <-> Aging

Looking through the EDIH descriptions vs medical innovation: Lack of the keywords that drive the health care sector:

- Patient Safety, Ethics
- Patient Centric

Proposition: the gap in Digital Innovation in health is even visible in EDIH

.... but maybe we attack it from the other side?

Our WG Health: first conversations

The first online meeting of this group: 17th of April 2023

Large workshop at the EDIH Network Summit, May 31st 2023

Core group conversation Fall 2023

Webinars 2024:

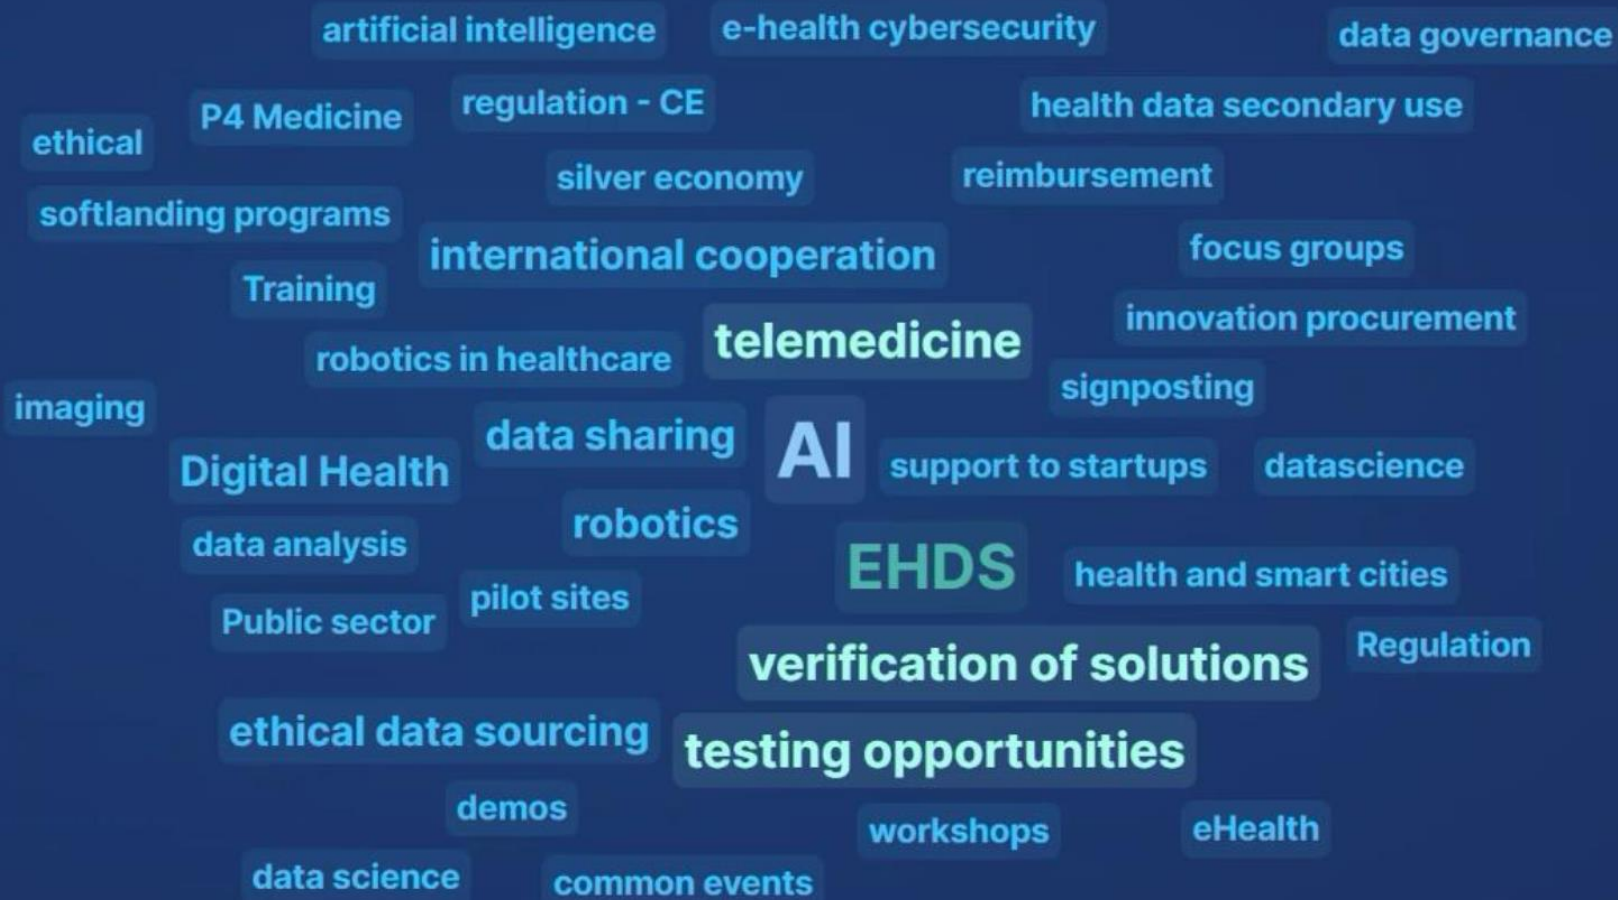

January 26, kl 10.00: Aging and Digital Health

February: Innovation procurement

March: tba.

Which 5 areas would you like to collaborate with other EDIHs in?

Which interaction mechanisms would you prefer to engage in as part of this WG?

Special interest groups

Seminars

Working on joint proposals

Other (please suggest)

Discussion forum

Taking WG Health forward

- Subscribe to the LinkedIn page 'EDIH Health'
 - And feel free to post all your Health related activities!
- FUTURIUM page EDIH Health
- Reach out:
 - Sebastiaan Meijer (community manager) smeijer@kth.se
 - Jaakko Aarnio (European Commission) Jaakko.AARNIO@ec.europa.eu
- Based on the input collected, webinars will be announced!
